DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "protection hood installed onto the body of the automobile" in claim 2 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement figures which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments, or remarks, section of the amendment. Any replacement drawing sheet must be identified in the top margin as "Replacement Sheet" and include all of the figures appearing on the immediate prior version of the sheet, even though only one figure may be amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing

sheets must be clearly labeled as "Annotated Marked-up Drawings" and accompany the replacement sheets.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Claim Objections

2. Claims 1 and 2 are objected to because of the following informalities: In claim 1, line 1, it is thought that "automobile" should be changed to –automobiles--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 2-3, "two ends" has no clear antecedent basis. On line 3, "hollow protection rib" and "plastic pad" have no clear antecedent basis. On line 3, the recitation that the protection ribs "are mounted" with a plastic pad is misleading and misdescriptive in that the ribs include a plastic end cap or pad but are not "mounted" through the plastic pad. On line 4, "appropriate positions" has no clear antecedent basis. On the last line, "vertical supporting protection ribs" are inferentially recited and it is unclear whether or not they are part of the claimed invention.

In claim 2, lines 1-2, "vertical protection rib" have no clear antecedent basis.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 1 and 2, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art Figure 1 in view of Koch.

Applicant's Prior Art Figure 1 discloses the claimed invention except for the horizontal protection members being tubular and including plastic end caps or "plastic pads".

Koch discloses a protection device including tubular horizontal protection members 12 with "plastic pads" 16.

It would have been obvious to one of obvious skill in the art at the time the invention was made to construct the horizontal protection members of Applicant's Prior Art Figure 1 to be tubular with plastic pads thereon as taught by Koch for a lighter weight protection device arrangement.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jaramillo et al. disclose another grill mounting similar to that of the current invention.
